**Keywords**: y-pyrone compounds, xanthones, flavonoids, biological activity, Halenia, Gentianaceae.

## **Abstract**

The review of data on the composition of  $\gamma$ -pyrone compounds (xanthones and flavonoids) of *Halenia* species, as well as some information on the biological activity is presented. The main biologically active substances of *Halenia* species are xanthones, flavonoids and their derivatives. *Halenia* species are of interest as a source of raw materials containing xanthones and flavonoids.
